

How is CTI Different?

- Structured and time limited intervention
- Goal focused not symptom based
- Transition is the focus of the work
- Depends on community connections to services and supports for sustainability (including landlord)
- Community and home-based service
- Staff step back and adjust their roles with each phase
- Adjust documentation to reflect areas of assessment and no more than 3 goals in service plan

CTI Phases Chart	Pre-CTI (In Outreach, Shelter or Interim Housing Pgm)	Phase I: Transition (Begins when person moves into housing)	Phase II: Try- Out	Phase III: Transfer	
Time frame/Intensity of Contact	Flexible	2-3 Months/Intense Weekly	2-3 Months/Moderate Bi-weekly	2-3 Months/Low Monthly	
Objective	Relationship Building Assessment	Complete Identification of Resources and connect client	Monitor resource impact and client connection/access	Complete transfer of services to the community	
Action Steps	Educate/Advocate Begin Phase Specific Plan Begin connection to resources Begin accessing benefits and income	Accompany each person to appointments, follow up to ensure connection Phase I Specific Plan Work on tenancy skills, income. Maintain motivation	Make adjustments to plan in collaboration with client Phase II Specific Plan	Meet with new service providers or others in the support system; reflect on work with client Phase III Specific Plan	
Potential Barriers	Housing placement may be delayed due to multiple challenges Often challenge to maintain motivation	Lack of resources; Participant hesitant to engage Several competing "priorities"	Client may not be ready to assume rent for RRH or tenancy in PSH; resources may be inadequate	Both tenant and worker may have difficulty ending, especially if goals aren't met.	
Strategies	Collaborate with Housing Specialist to teach/model housing location process; present services as a helpful resource, not an obligation	Do advance work of creating resource networks Prioritize needs based on relevance to housing stability	Empower client to do what they can on their own; create alternative plans if necessary Use skill building techniques	Reduce involvement gradually and inform participants early on about the length and nature of CM support	

Implementation

These types of implementation strategies resonated for staff

- Use of tools/sample forms/resources provided in the training
- Discuss adopting some or all of the model with my teammates and in staff mtg
- Discussion of adopting some or all of the model with my supervisor/manager

Goals for the Supervisors Sessions

- Discuss ideas for implementation by CTI elements
- Identify resources and supports needed, barriers to and questions about implementation
- Share input on what type of structure(s) will help support implementation

Poll CTI Integration

Poll: CTI Integration

Which aspects of CTI are you already integrating into your programs?

- tenant goal/recovery focus in interventions
- focused assessment
- focused service/housing stabilization plans limited to 3 goals
- learning about housing and homelessness history
- connecting to a network of care/support
- developing individual resource lists
- teaching tenancy and self-advocacy skills
- Planful coordination with landlords/property management
- helping people develop structure and purpose in their lives
- helping people address issues that result in lease violations or present housing risks

Small Group Discussions on Strategies

Join a breakout group Say "Hello" to each other Identify a recorder and reporter Discuss for 10 minutes • What you interests you about implementing CTI? What ideas do you have for implementation? • What doesn't interest/excite you about CTI? • What questions/concerns do you have?

Support for CTI

Supervision and agency support key to implementation

Focus

- High quality services consistent with the practice
- Achievement of program goals and outcomes
- Support and resources for staff and participants
- Complex needs and challenges posed by participants
- Development of staff skills and knowledge of CTI and other EBP's
- Supervision is delivered weekly through group and individual sessions

Structured Supports

Individual and Team Supervision:

- Weekly staff supervision meetings
- Caseload tracking though the phases

Case Conferencing:

 Highlight best practices, identifies themes around barriers, highlights resources, provides clinical consultation

Team Meetings:

• Team meetings have an informational, monitoring and support function, track where people are in the transition and identify common barriers, share information and resources among team members, alert team to people in distress or crisis, identify best practices, review everyone at least briefly

W **CTI Team Supervision Form** This form is filled out every week during the team supervision meeting to document in-depth discussions about the highest priority clients (use reasons listed below as a guide). Before the meeting, the case manager fills in the names of clients with highest priority, based on past week's fieldwork and any change to client status and records explanation and one reason code. The supervisor places a \mathbf{v} mark in the far right column next to each client who has been discussed. Explain why it is important to discuss this client at today's meetina. Place \sqrt{mark} Record the reason code in the box. 1=ready to give new case presentation 2=client faced with a crisis or big change in box when Worker's **Client's name** team 3=cannot be located initials 4=discuss whether refusal is permanent discusses 5=time to prepare for a new phase 6=time to prepare for end of intervention client 7= difficult problem with support network 8= positive occurrence to share with team

CTI Tools for Staff

- The <u>Participant/Tenant Resource Guide</u> structures work around community resources and supports
- The <u>Harm Reduction Plan</u> helps participants think through options to mitigate behavior that is threatening tenancy/creating risk for eviction
- The <u>*Closing Note*</u> outlines the process for the end of the transition and provides guidance for final meetings and handoffs to network of care.

Adjustments to Documentation

- •Paperwork can help shape and reinforce CTI practices
- Can adapt forms currently in use to be CTI-informed
- •Ensure community stabilization goal is central
- •Limit goals to two or three
- •Use areas of focus for assessments
- Assessments connect to service plan
- •Provide sample chart notes and review in supervision
- •Sign off by supervisor on notes and plans
- Supporting documentation: Participant Resource Guide and Harm Reduction Plan were well-received by staff during training
